

AMAN KUMAR

amankumardev688@gmail.com | +91 94730 44166 | Patna, Bihar, India | Portfolio | LinkedIn | Github

SUMMARY

Computer Science undergraduate with hands-on experience in full-stack **web development** and a growing interest in **data analysis and machine learning**. Skilled in building responsive web applications using React.js and analyzing data to derive meaningful insights. Strong foundation in data structures, algorithms, and problem-solving.

SKILLS

Languages

C, C++, Python, JavaScript

Frameworks/Tools

React.js, Tailwind CSS

Core Concepts

Data Structures & Algorithms,
OOP, Responsive Web Design,
Machine Learning Basics

EXPERIENCE

InternPe , Web Development Intern

07/2024 – 07/2024 | Remote

- Developed responsive web pages using HTML, CSS, and JavaScript, improving UI usability
- Designed and structured user-friendly interface components for better user experience
- Strengthened debugging and problem-solving skills through real-world tasks

CodSoft , Web Development, Intern

03/2026 – 04/2026 | Remote

- Built responsive web applications using HTML, CSS, and JavaScript
- Optimized UI performance and enhanced application responsiveness
- Gained hands-on experience in the complete web development lifecycle

Cognifyz , Web Development, Intern

01/2026 – 02/2026 | Remote

- Worked on real-world frontend projects using modern web technologies
- Designed and optimized responsive user interfaces for better performance
- Collaborated on development tasks to improve frontend functionality

PROJECTS

Snake Classifier (AI Web App)

- Developed a machine learning-based web application to classify snake species from images
- Integrated image upload and real-time prediction system for user interaction
- Built responsive frontend using React.js and styled with Tailwind CSS
- Deployed live application for real-time usage

Vehicle On Rent System

- Developed a web-based vehicle rental system with booking and management features
- Implemented vehicle listing, booking functionality, and user interaction system
- Improved usability and user experience through responsive design

Face Expression Detection Project

- Built a system to detect human facial expressions using image processing techniques
- Applied machine learning algorithms for emotion classification
- Improved accuracy of expression detection through optimized model usage

Chess-Game

- Developed an interactive chess game with complete game logic and rule enforcement
- Implemented piece movement, legal move validation, and turn-based gameplay mechanics
- Designed a responsive and user-friendly interface for smooth gameplay experience
- Enhanced problem-solving skills by handling complex game logic and edge cases

EDUCATION

Bachelor of Technology in Computer Science Engineering, Quantum University

08/2023 – 2027 | Roorkee, India

CERTIFICATES

5-Day AI Agents Intensive Course with Google

AWS

AWS Fundamentals – Cloud computing basics

Deloitte

Deloitte Virtual Internship – Industry exposure

Google

Microsoft

Microsoft Learning Program – Technical skill development
